

White Line Range

Colorado Plus

The Colorado Plus is a model for flexibility and versatility in a frame tent. The starter version has a base section 4 metres wide x 5.9 metres across. Additional two metre wide sections can be added to increase the tent's scope. This tent is a development of the Arkansas being based on the same solid tube frame; designed for the same sort of use over the medium to long term and in all manner of conditions. The sidewall panels, all of which have a gauze window with cover, can be rolled up to create additional entrances or exits and the end panels can be rolled up out of the way giving a great deal of flexibility in how the space is arranged.
