

Condor and Ranger

The new addition to Tortuga's round tent family is the Ranger: Higher sides, taller centre and 5m in diameter – this tent has enough room for almost anything! It's still a simple sturdy-design with air vents built into the tip, an overhanging edge and an A-frame entrance that is over 2m tall but it also has extra side poles to help ensure the tent maintains its shape. Another fantastic tent for group activities or general camping.

- Classic round tent
- Built-in air vents
- A-frame entrance
