

White Line Range

Nevada and Yukatan

The largest of the Tortuga pyramid range are the Nevada and Yukatan tents. Available in two different cotton weights, these tents offer the space you need to cater for larger gatherings while retaining superb good looks. These tents have taller sides than the others in the pyramid range and a central pole height of at least three metres making them 20% higher providing plenty of headroom. The floor area is a very spacious 23m - 25m creating more than enough room for larger group activities or gatherings. These are fine tents, capable of putting in many years of hard wearing service.

- Floor area of 23m²
- Three metre central height
- Choice of fabric weight
