

White Line Range

Alaska

The Alaska is a simple to erect, versatile frame tent that is perfect for a multitude of uses. One end and one side can be rolled up out of the way or propped up to create an awning; the other end is zippered to give an alternative entrance. It features integral windows for all round lighting, a hard-wearing roof of polyester coated cotton and a tough splash guard around the base for added protection making this a tent built to withstand all kinds of weathers. It is available in two sizes and there is an optional inner tent with a built-in ground sheet. Whatever your requirements, the Alaska won't let you down.

- Versatile frame tent
- Side and end awning
- Optional inner tent
