

White Line Range

Arkansas

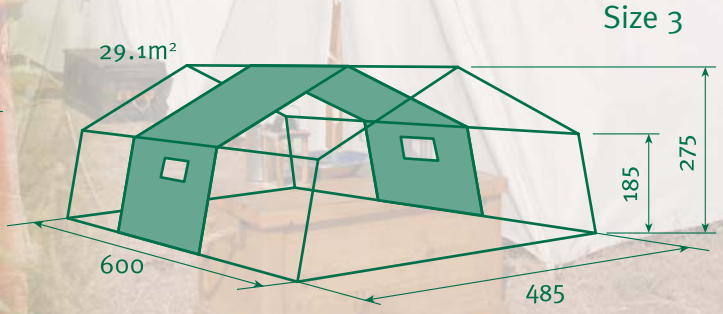

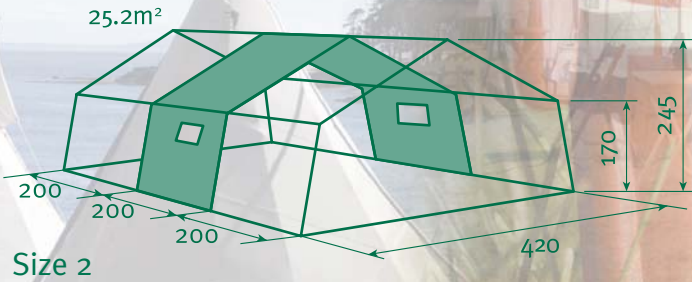

The Arkansas is the giant of the Whiteline range, being the largest tent supplied by Tortuga, with a standard floor space of 58m². This is a heavy-duty tent designed to be used for extended periods of time making it suitable for training and large camps. It can even be used in emergencies or disaster zones. Its modular design allows additional two metre segments to be added to provide extra space. By extending beyond the end walls you can turn the ends into internal walls instead and create separate areas. The side walls, which can be rolled up, have integral gauze windows with cotton covers to ensure that the interior remains light, while tensioning

straps keep the entire structure rigid. Yet with all these features the tent weighs in at less than 190kg in its largest configuration.
