

# Set up Winnipeg Size 2

## Frame layout

1. Lay out the frame according to the layout above and connect the roof parts together (do not attach any foot tubes at this point)  
**Tip:** tie a rope along the top of the roof to prevent the frame from coming apart while it is being built
2. Lay the roof canvas (without side walls) to one side of the frame and then pull it over the frame. Secure the roof.
3. Starting on one side: attach the foot tubes to the connectors (you may need several people). Repeat with the other side.  
**Caution: avoid resting the entire frame on one foot tube!**
4. Attach the straps to the foot tubes and peg down the tent.
5. Attach the side panels using the velcro straps and the front and back panels using the hooks.
6. Secure the tent appropriately using extra ropes or ratchet straps (not supplied) if necessary.

Always check the guy ropes of your tent and re-tension if required  
Mark guy ropes and pegs to avoid tripping over them in the dark

### **Frame Winnipeg Size 2**

6 x Y connector  
6 x X connector  
8 x iron pegs 30 cm  
  
9 x tube A (193cm)  
8 x tube B (265cm)  
8 x foot tube (188cm)
